

AQUAPONIC SYSTEM

Aquaponics is where aquaculture and hydroponics meet. Aquaponics allows you to produce food in an efficient ecological and safe manner at your home.

THE MONITORING

The product is an add-on system to help manage an aquaponic system.

The addition of our product makes it possible to check attributes of an aquaponic system while out of town, or just too busy to check the system in person.

Our product provides the ability to monitor, adjust temperature, and dispense fish food. This functionality helps to improve the performance and results of any system.

OBJECTIVE AND USEFULNESS

- ▶ To increase the function, productivity and ease of use for aquaponics.
- ▶ To reduce maintenance hours.
- ▶ To improve monitoring and controlling.

TARGET GROUP

- ▶ Owners and operators of aquaponic systems who can not constantly monitor their system.
- ▶ People that are interested in making their aquaponic system easier and more comfortable to handle.
- ▶ This technique can furthermore be used for all kinds of fish tanks.
